

**CSCE Vancouver Annual Pre Conference
Envision Workshop**

Hello everyone,

ENVISION® Sustainability Professional Accreditation Course

Similar to LEED for buildings, Envision® provides a holistic framework for planning, designing and awarding all types and sizes of infrastructure projects. *Envision is the product of a joint collaboration between the Zofnass Program for Sustainable Infrastructure at the Harvard University Graduate School of Design and the Institute for Sustainable Infrastructure. With over 5,600 Envision Professionals in North America, the Envision system has seen increased uptake from public and private agencies across Canada.*

The Envision® Sustainable Professional Educational program is a full-day credentialing program for training participants to use *Envision* and to incorporate systems-level thinking into their approach to sustainability, considering the broader, often overlooked, impacts of a project. The purpose of this training is to equip participants to use the Envision® framework and rating system and to prepare participants to take the examination to become an Envision® Sustainability Professional (ENV SP). The course is designed to be engaging, utilizing a highly interactive approach that features group case-study work.

Overall Learning Objectives:

At the end of this course, you will be able to:

- Understand the logic, organization and methodology of the Envision® framework
- Use the Envision checklist
- Use the Envision rating system
- Determine levels of achievement in the Envision rating system
- Navigate the ISI website and Envision portal
- Understand and describe the verification process
- **You will also be qualified to take the ENV SP exam for your credentials**
